FOCUS

- 3D Art / Blender
- Generative AI
- Game & Level Design
- HTML / CSS3 / Vanilla JS
- Branding / SEO
- Rapid Prototyping

EDUCATION

Art High School
Computer Science - University of Turin

PROFESSIONAL OPENNESS

B2B collaborations, creative consulting, prototyping and new development teams.

CURRICULUM VITAE / PORTFOLIO - ENGLISH VERSION

Daniele Pomposelli

Digital Creative | 3D & AI Artist | Indie Game Developer

Creativity, Artificial Intelligence and game design for original, scalable and recognizable digital projects.

Profile

I am a digital creative and independent developer with a background rooted in video game history (Commodore, Amiga) and a strong focus on future technologies. Throughout my career, I have combined an artistic education (Art High School) with technical skills (Computer Science - University of Turin), developing a hybrid and versatile profile.

Whether producing indie titles in a team or collaborating with entertainment companies to create interactive experiences, my goal is to blend creativity, Artificial Intelligence, and solid game design to deliver original, scalable, and commercially recognizable digital projects.

Core Competencies

3D Art & Pipeline Blender assets, materials, covers, logos and UI.	Generative AI AI workflows for textures, concepts, video and 3D meshes.
Development & Prototyping Browser prototypes in HTML, CSS3 and JavaScript.	Game & Level Design Game logic, world-building and balancing for indie projects.
Digital Branding & SEO Visual identities, SEO copywriting and launch materials for websites, social media and YouTube.	

Professional Experience

Professional Experience

Indie Game Development (IIITeam) | Game Designer, 3D Artist & Developer

Co-creation and production of video games and digital worlds within the IIITeam collective.

- Production of video games and digital worlds with a transversal approach across design, visuals and prototyping.
- Management of concept art, 3D assets, level design, prototypes and promotional materials.
- Main titles: RED41 Titan, TATA COOK, Archipelago, Bubble Taxi.

R&D and Consulting (Huawei) | R&D Collaborator

Technical and creative collaboration on entertainment machines, custom computers and consoles.

- Creation of a hardware and software prototype for a new console based on ARM architecture (internal, non-commercialized project).
- Integration of product design and hardware engineering, with direct exposure to tech-company development dynamics.

Web Project Management & Digital Identity | Web & Content Creator

Ideation, development and management of web projects such as Sesiavalley and GustosamenteVale.

- Branding, SEO, visual communication and multimedia content creation to enhance online identity.
- Production of materials for websites, social media, YouTube and multi-platform launch campaigns.

Retro-Gaming & Foundations | Developer

My development origins, from the Commodore 64 era to Amiga.

- Programming on Commodore 64 of the vertical shooter Guerra nel Golfo.
- Amiga experience with RED41 The Silent Death and the fighting game KILLER.
- A retro-gaming foundation that still influences creativity, visual synthesis and game design.

Selected Projects

Selected Projects

RED41 Titan

Modular third-person PC project with open-world design and visual communication.

TATA COOK

Cooking entertainment prototype focused on accessibility and family-friendly communication.

Archipelago

Web / PC / Mobile sandbox prototype with islands, dynamic water and exploration.

Bubble Taxi

Mobile-friendly browser game with quick interactions and simple UI.

Goals & Collaboration

Goals & Collaboration

I am currently seeking new challenges in the entertainment industry. I combine AI, 3D, game design and prototyping to turn ideas into concrete, communicable and scalable digital projects.

- B2B collaborations and consulting for companies, agencies and software houses that need a versatile 3D/AI Artist, a rapid prototyping expert or a hardware design consultant.
- Forming new development teams with programmers and sound designers to create new indie titles for the PC, Console and Web market.
- Creation of rapid prototypes, visual concepts, promotional materials and digital identities ready to be presented professionally to the market.

Working Method

Creative Approach

1. Idea

Definition of the creative core: hook, world, target, game loop and project identity.

2. Prototype

Use of HTML/CSS/JS, 3D and AI to rapidly transform a concept into an interactive proof.

3. Visual Identity

Logo, UI, cover art, visual tone and YouTube/SNS materials aligned with positioning.

4. Launch

SEO descriptions and launch-ready assets for websites and social platforms.
